Housekeeping

PHASE 1

Data Removed

2 New Processes

Project Archive Process

Allows for safe storage of projects on a separate database reducing irrelevant data in production.

Resource Import Process

Prevents further growth of unwanted resources.

Housekeeping

PHASE 2

Data Removed

Highlights

Improved analysis

Improved analysis - deeper insights into data, additional diagnostics & analysis came further opportunities to purge.

Additional data deletion

Increased data deletion based on better action based insights due to further analysis.

“

We didn't have to explain things in a huge amount of detail for the team to understand what we were trying to do. It was quick because Locana could pick up the reins and improve on the status quo for us.” ”
