About Contruent

Our Mission

Empowering decisionmakers to build our world's infrastructure with precision and speed.

Con-tru-ent

Derived from 'construction' + 'true' + '-ent' (performing, promoting, or causing a specific action)

Origin

1990s: Began as ARES PRISM, project controls software.

We Have a Problem!

On average, projects have a 27% cost over-run

Only 55% of projects are delivered on time and on budget

Projects are 3.8x more likely to fail without full integration of systems and processes

Demand for Infrastructure

The recent trillion-dollar infrastructure bill will help drive new projects in the US to satisfy demand.

Project Complexity

Increasing Requirements:

- Transparency
- Sustainability
- Health and safety
- Quality controls
- Design complexity
- Project size
- Faster, lower cost

Future of Work

Covid has accelerated the need to accommodate remote work collaboration.

Data Transparency and Trust

Data Management: Connected Platforms

High Rate of Innovation, Learning & Decisionmaking

Enabled by modern cloud technology that delivers:

- Data sovereignty and security
- Cross-company data integration and aggregation
- Disruption free, complete process chains
- Data sharing and collaboration across teams and supply chain
- Open API standards for interoperability
- Application ecosystems and marketplaces

Dynamic Dashboards and AI/ML assisted BI

Construction Digital Evolution

2D

80% Adoption

Desktop

Early adoption of desktop-based scheduling, estimating and financial ERP

2.5D-3D

50% Adoption

Web & Cloud

Then added desktop and web-based project and document management software

3D/BIM/VDC

25% Adoption

Mobile

Smart phones and drones open automation to field management data capture and access

4D/5D Digital Twin

5% Adoption

Insights

Cloud computing, IoT, Business Intelligence (BI) and AI/ML

1990s 2000s 2010s 2020s

Adoption is lagging technology evolution. Technology leadership is not equal to market leadership.

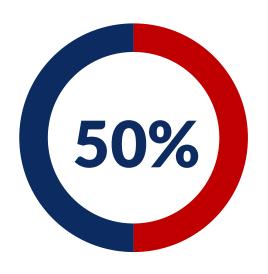

The Construction Industry Has Been Slow to Digitize

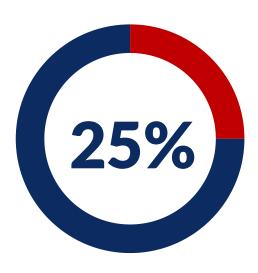

57% of firms spend less than 2% of total revenue on IT and software.

The construction industry spends half as much on IT compared to the global industry average.

Of firms have a digital software strategy.

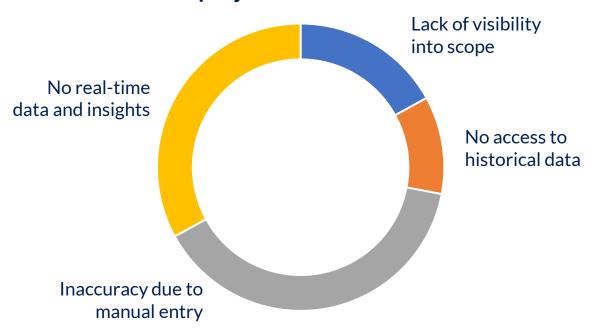

Obstacles to Building Digital Trust

- Lack of Investment
- Black box and auto calculations
- Fear of the unknown (AI/ML)
- Data quality, verification
- Data lag and timing of data
- Volume of Data
- Security of Data

Which of the following challenges have you experienced the most with traditional project controls software?

Develop the Building Blocks of Digital Trust

Data Creation Capture & Collection

Data Capture

Governance, Integration & Collaboration

Processing & Transformation

Data Management

Reporting & **Visualization**

Analysis & Business Intelligence

Data Analysis

Data Trust and Project Controls Process

Leveraging a <u>Project Controls CDE</u> to manage inputs and outcomes including:

Establish Cost Baseline

- Project templates
- Cost Inputs
- Schedule inputs
- WBS, CBS, OBS

Cost Data Capture & Collection

- Field progress
- Change Mgmt
- Contract Mgmt.
- claims / invoices
- Supply chain mgmt.

Data Processing & Calcs

- Earned value
- Budget forecasts
- TPD updates, etc.

Data Integration & Collaboration

- ERP/MRP
- Cost controls
- Schedule
- Estimating, etc.

Data Analysis & Decisions

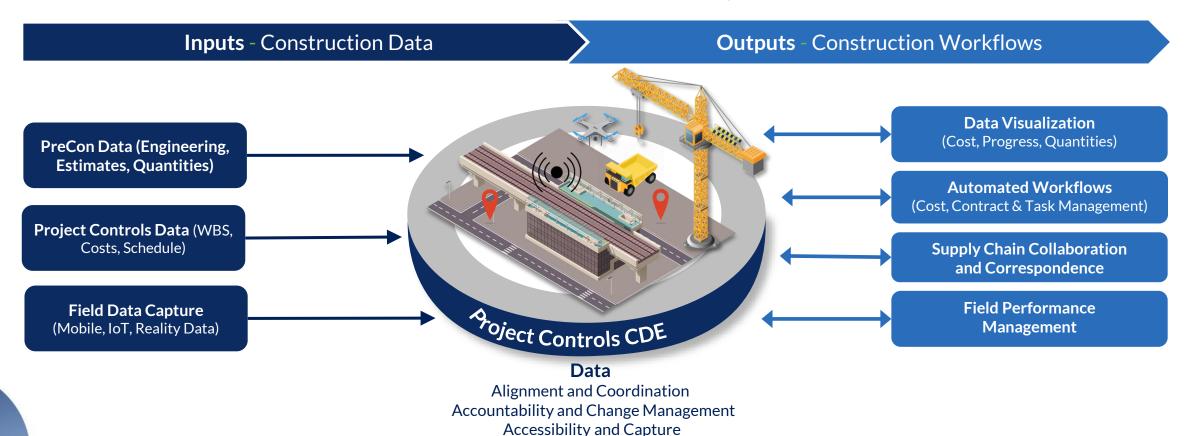

- Dashboards
- Reports
- Business intelligence
- Data visualization

Data Trust and Project Controls

Transform Project Controls and Program Management and deliver better, more predictable project outcomes.

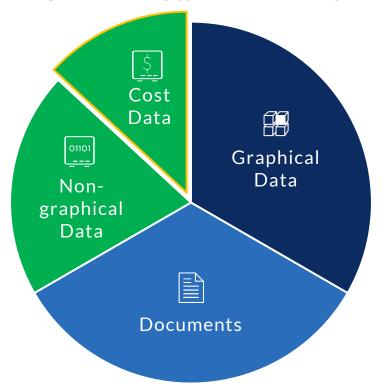

Common Data Environment

Project Controls CDE: Cost and Schedule

- Single source of truth
- Connects all data types around the project
- Data access and capture procedures
- Workflows enabled on top of CDE
- Data security

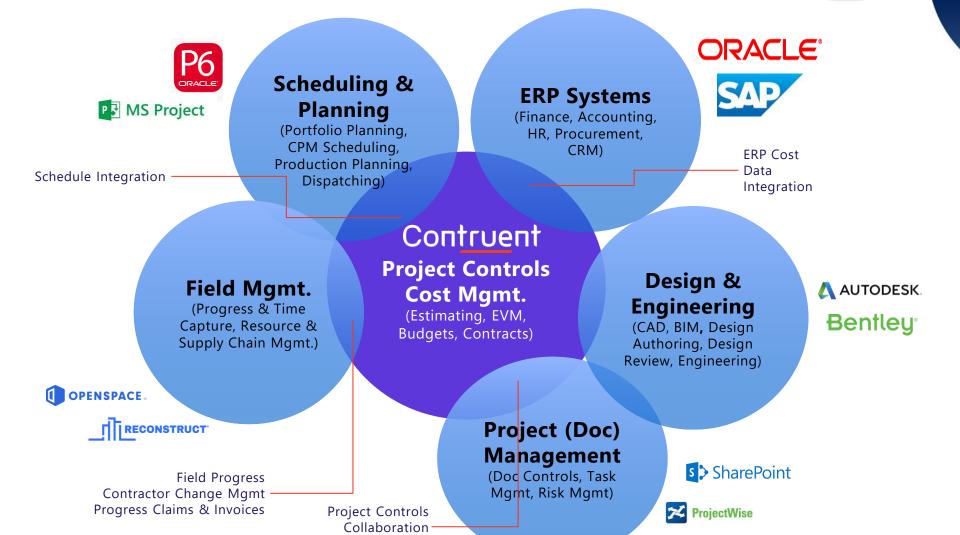

Common Data Environment

Connected Data Environment

CDE / DMS Connectors

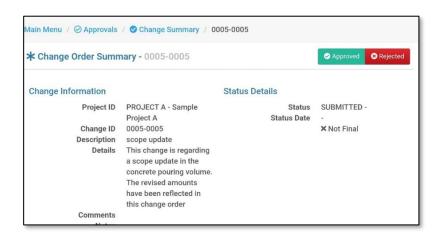

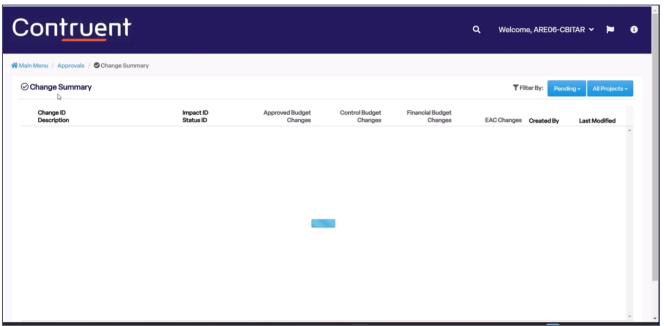

Collaborative Workflows

- Automated workflows
- Repeatable templates & procedures
- Structured data
- Connected data and resources
- Cloud-based coordination

Approvers receive email notifications and can utilize mobile devices to make decisions

Advanced change management with workflows for an in-program user notification, action items, review and approval

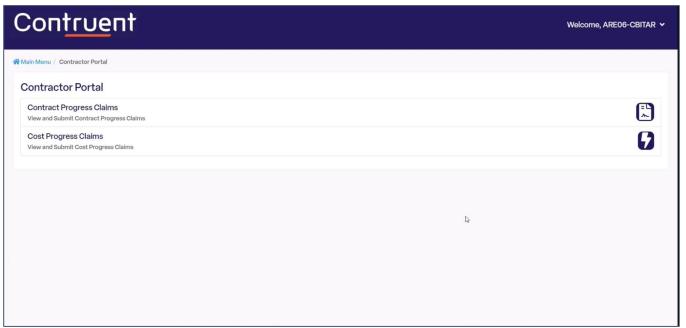

Collaborative Workflows

Supply Chain Coordination

Contractor Portal provides visibility into the progression of contractor claims, allowing you to track progress

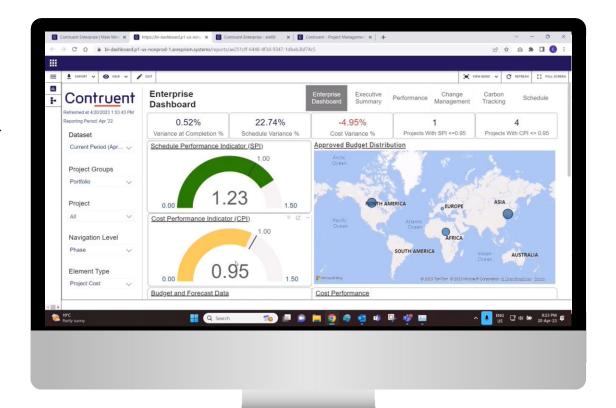

Gated contractor access for data viewing, template downloads and uploads

Data Visualization, Analysis & Decisions

- Dashboarding and reports
- Business analytics/ intelligence
- BIM 3D/4D/5D and digital twins
- AR/VR
- AI/ML

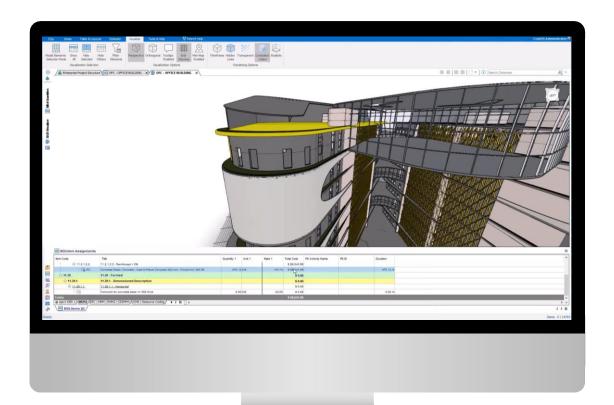

With enterprise dashboards that show key performance indicators and allows users to easily drill down into problem areas.

Data Visualization, Analysis & Decisions

- Dashboarding and reports
- Business analytics/ intelligence
- BIM 3D/4D/5D and digital twins
- AR/VR
- AI/ML

With model-based 3D/5D environments, data can be interrogated and analyzed in a more immersive experience reducing errors and omissions.

Project Controls Data Trust Summary

How to build trust, increase collaboration and improve productivity:

- Capture real-time, structured quality data capture with mobile, reality capture and IoT
- Break down data silos with open platforms and common data environments
- Make data more accessible to more team members (share) with cloud/web-based collaboration software
- Make better sense of your data with purpose-built solutions that put data to work
- Make data more visible with data analysis, dashboards and reports so you can better, faster decisions

What will be the outcomes of data trust?

- **Productivity:** Teams will be more efficient/productive as they have access to the data. They need to do their work; they can more easily coordinate with others; and they can respond quicker to events and issues
- **Risk and Dispute Management:** Resolve disputes and avoid issues as there is more access to the same data (i.e., events, project schedule, costs, material quantities/progress)
- Project Controls: Keep projects in control as near-real time access to higher quality data for cost and schedule

Built by Project Controls Experts for Project Controls Professionals

Purpose-built by expert, experienced practitioners who do what you do

Over 25 years of best practices and intellectual property programmed in

Intuitive workflows get more of your team involved sooner and more easily

Harmonize data between and across projects to facilitate better decisionmaking

To ensure your projects stay on time and on budget

Best-in-Class Project Controls Solution

Cost Management
Optimize Project Spend
& Performance

Change Management Account for Change

& Maximize Efficiency

Data Insights
Improve Visibility to
Make Informed Decisions

Contract Management
Manage Contracts

& Contractor Activity

Project Controls Add-Ons

Engineering, Procurement &
Field Management
Extended Project &
Portfolio Visibility

Integrator
Control Project
Spend End-to-End

Estimator
Set Budgets with Quantity
Take-off & Estimating

Faster to Achieve Your Desired Business Outcomes

Optimize Project Spend & Performance

2%

Reduction of annual spending due to better forecasting and fewer overruns

Common Data Environment

Improve Visibility to Make Informed Decisions

80%

Reduction of time spent on data collection, entry and validation

Data Visualization

Manage Change & Maximize Efficiency

4%

Reduction of contract overspending due to improper change management

Automated Workflows

Manage Contracts & Contractor Activity

1%

Reduction of contact spend with better data quality and reliable reporting

Supply Chain Collaboration

Comprehensive Cost Controls Solution for Owners/EPCMs

- Delivers a project controls common data environment for projects/programs and the enterprise
- Deep, lifecycle solution that connects estimating, costs, contracts and field performance
- Project and portfolio data insights and intelligent decision support

Deliver Fastest Time-to-Value

- Easy to deploy and scale with modern SaaS platform
- Easy to use/learn with modern web/mobile user experience
- Self admin and automations
- · Open data access with APIs and integrations to connect costs controls to other critical systems

Connect Teams that Own Project/Program **Costs and Budget**

- · Keeping everyone on the same page—cost controls collaboration connecting teams and supply chain
- Understand status, forecast and how to get there with quick data access, forecasting (time phasing) and task management
- Best-in-class change management
- Real-time data access to make faster better decisions
