

OUR WORK

Portfolio, program and project (P3M) management by RPS

Advancing Clean Energy Schools Program

Location: Queensland (various)

RPS was engaged to provide program advisory and project management services for the Department of Education Queensland's Advancing Clean Energy Schools (ACES) Program. Completed in mid-2022, the program has seen 200,000 solar panel installations and a range of other power and money-saving measures delivered at 912 state schools. Establishing the ACES program management office, our consultants created significant efficiencies for ACES through program leadership, individual project management and our own proprietary program management software – myProjects.

Navy Capability Infrastructure Sub-Program

Location: Australia (various)

RPS is supporting a \$2 billion infrastructure program that will introduce and sustain technologically advanced warships to the Royal Australian Navy. The program runs for 10 years and involves the delivery of infrastructure at several Navy bases across the country. RPS is engaged by Defence as both the program and project managers. Our role has included the establishment of a program management office (PMO), program and project controls management, and advising Defence on the program delivery method and contracting strategy.

Regional Rail Revival Program

Location: Victoria (various)

RPS is supporting the delivery of major rail upgrades in regional Victoria, providing project control and program management for the \$4 billion Regional Rail Revival project. Engaged by the Aurecon Jacobs Mott MacDonald Joint Venture (AJM-JV) our team is developing and implementing processes, program control procedures, and team capabilities to support the successful delivery of capital and design programs.
