PRODUCT INFOSHEET

Priorities Matrix
Week 21 Priorities

	URGENT	NOT URGENT
IMPORTANT	**1 DO NOW** — 9 KC Recommendations — 8 Tasks	**2 DO NEXT** — 7 KC Recommendations — 127 Tasks
NOT IMPORTANT	**3 DELEGATE** — 6 KC Recommendations — 365 Tasks	**4 LATER** — 27 KC Recommendations — 1071 Tasks

AI-Enabled Construction Project Management for Major Projects

Owners and contractors struggle to deliver major construction projects on time and on budget. Project planners and controllers are faced with ever-increasing complexity. Foresight's next generation AI-enabled construction project management platform places the schedule at the heart of project execution. We apply AI, machine learning and natural language processing to schedules -- yielding unbiased, data-driven decisions with full transparency.

BENEFITS	FEATURES
Identify Priorities and Set Action Plans	• Recommendations • Clear Priorities • Identify Milestone Blockers • Completion Plan
Collaborate with Diverse Stakeholders	• Assign Tasks to Individuals • Email Notifications • Role-based Access • Importing Tasks that Live Outside of the Schedule
Recognize Risks and Bottlenecks	• Summary View of Progress, Risk, Quality • Monthly Risk Density • Logic Quality Checks • DCMA Assessments
Learn from Past Projects	• Activity Duration Forecasting • Network Impact of Duration Overruns • Phase Performance • Insights from Past Performance
Enhance Schedule Visibility and Reporting	• Automated Report Generation with Advanced Filtering • Custom Reports • Portfolio View • Schedule Forecast

Who Benefits From Foresight?

- Schedulers/Planners
- Project Control Managers
- Project Managers/Directors
- Superintendents
- Head of Construction

ABOUT FORESIGHT

Foresight's construction project management platform helps owners and contractors deliver major projects on-time and on-budget by automatically identifying priorities, risks, and action plans in Primavera P6 or Microsoft Project schedules. We place the schedule at the heart of project execution, enabling project managers, controllers and schedulers to make data-driven decisions. Leveraging AI, machine learning and natural language processing, Foresight unleashes predictive insights about delay risks and work prioritization.
