XER Schedule Toolkit

More than just a
Schedule Quality Tool

The full project team can benefit from XER Schedule Toolkit with shared access to view and analyse the project schedule

www.xertoolkit.com

XER Schedule Toolkit is an all-in-one, third party toolkit that allows planners, schedulers and the wider project team to view, analyse and share Primavera P6, Microsoft Project and Asta Powerproject files.

Our software contains automation tools that help to enhance the planning process and ultimately drive improvements in the successful delivery of projects to time and budget.

Our cloud based solution provides planners & schedulers with a range of tools that allows them to automate day to day tasks, saving time and money whilst giving the full project team intelligent access to the schedule in a format they can understand and derive value from.

View, analyse & share P6, MPP & Asta project schedules at the click of a button.

XER Schedule Toolkit provides a dynamic schedule reader that can be used to communicate the project's programme goals and objectives to the entire project team. Combined with the Toolkit's powerful share function, the toolkit ensures that everyone is always aligned to the latest version of the project schedule.

The schedule viewer can be structured and filtered similarly to Primavera P6, including by WBS and Activity Codes and layouts can be set up by individual users or by project controllers and shared across the team.
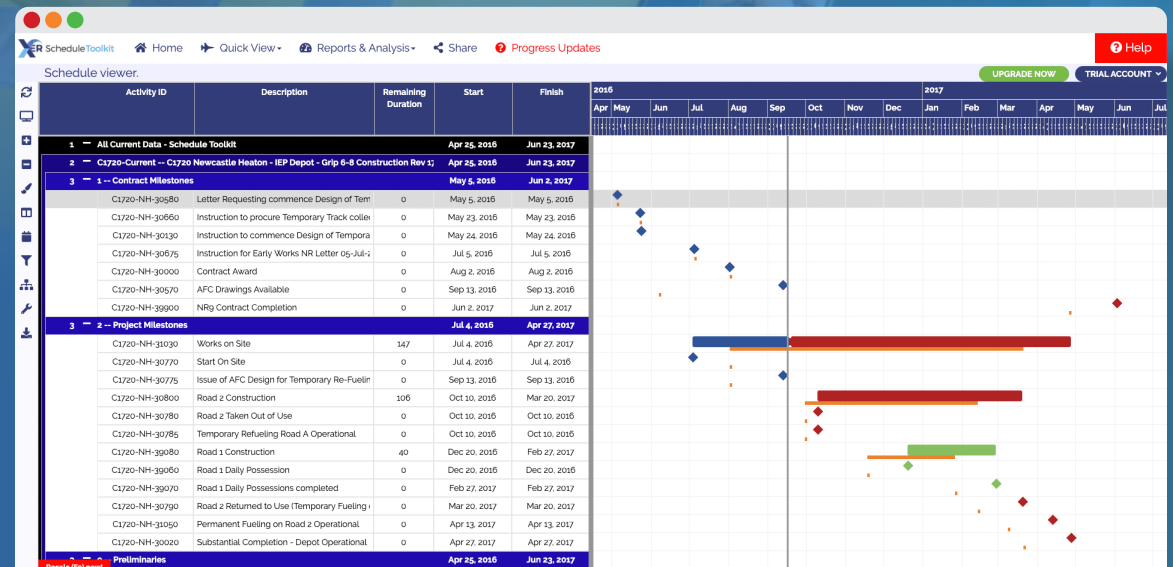

How reliable is your Contractors Programme?

Our schedule quality tool allows you to set your own parameters, incorporate contract restrictions and check the programme compliance with a specific contract such as NEC3.

XER Schedule Toolkit produces a comprehensive output report, detailing all schedule deficiencies that can be used to analyse and where appropriate resolve problems.
Forensically compare Project Schedules in Seconds

XER Schedule Toolkit provides a detailed comparison and trend report between multiple versions of a project schedule.

The software produces a wide-ranging report detailing differences between dates, durations, logic, descriptions, resource assignments and even the activity code assignments.

Ensure Everyone is working to the latest progress schedule

Set up various schedule layouts, filters & dashboard reports at the start of a project.

Create share groups for the whole team or personalised to a specific department or individual.

Use the 'share' feature to give everyone instant access to view and analyse the contemporary project schedule in a format that is relevant and useful for them.

Request progress updates at the click of a button

Provide your work package managers with the capability to provide progress updates for the activities which they are responsible for delivering.

Following each progress update, you can simply load the latest version of the project into XER Schedule Toolkit and everyone is instantly aligned.

Our wide range of plans ensure that there is a package to cater for every need including freelance planners, small and medium enterprises, projects and large corporations.
