

GLOBAL PROJECT CONTROLS LIFETIME ACHIEVEMENT AWARD

WHAT THE REVIEW PANEL ARE LOOKING FOR

For the lifetime achievement award, the review panel are looking for evidence that will include a mix derived from:

- the thought leadership of the individual regardless of whether that is current or historic from which the benefits can be clearly seen to have been realised
- recognised by our community as a major contributor to maturing one or more aspects of the professionalism of project Controls practice
- a “go to” person for the project controls community for advice and inspiration
- an educator and mentor, sharing their knowledge and experience freely
- experienced in a wide and diverse sub-set of the key topics that constitute project controls and its context in the bigger picture
- a proactive contributor and communicator in the discussion and publication of, for example, white papers, blogs, books, podcasts and other materials
- a leading spokesperson in promoting reflective and transformational discussion around project controls. Making connections with appropriate stakeholders to enable and facilitate beneficial change in our community.

We are not seeking to make the nomination process cumbersome for this special award so an overview of your reasoning in no more than 400 words is all that we ask along with permission to follow-up if needed.

There will be no discussions or interviews with applicants of the awards' submissions. Each written submission and documents are reviewed by a team of independent, professional, industry judges who will not confer on entries. Their decisions are final.

Please note our rules of entry document on www/projectcontrolexpo.com/awards

From 25th May 2018 it is essential for organisations to be GDPR compliant. On the Awards web submission form there is a check box to allow your submitted data to be used for the awards judging process. Please ensure the box is checked for your submission to be valid.

Project Controls Expo is organised by ProjectControlsOnline.com (PCO) and supported by AACE, ACostE, ECITB and PMI UK.
